PROJECTS

Resume analyser — *Using NLP*

I have learned about diferent libraries like NLTK and python . The major idea behind this work was to analyse the resume. The main objective of a resume analyzer is to make the recruitment process more efficient, objective, and effective, ultimately leading to better hiring decisions.

Artwork – **Using Html, CSS, Javascript**

It was basically designed using Html,CSS & Javascript to show artwork(paintings). The journey through our digital gallery as inspiring and enchanting as we do. It was a static website having a contact feature to send message.

Password management system – **Using Python**
I have learned about Tkinter and python.It is basically designed to manage password and generate random password.

Milk dairy management – **Using Vb.Net**
It is basically designed for manage dairy firm.
It manage customer information.

Hotel management system – **Using SQL**
It is basically designed for manage hotel information.

SKILLS

Python, Machine learning, NLP, Data Science,Excel, Html, CSS, Javascript, R programming, C programming, C#, SQL, VB.Net, DBMS

EDUCATION

Career point University, Kota— **BCA (Data Science)**

2022 - 2025

School of excellence, khichripur, Delhi — *XII Class - CBSE* 2022 – 90%

RSKV, patparganj, Delhi— *X Class - CBSE*

2020 – 85%

CERTIFICATIONS

TECHNOCRUISE CERTIFICATE (DATA ANALYTICS) - 2022

AI Data Science and Data analytics, Samatrix.io -2023
Data Analysis using python,Samatrix.io- 2023

R Programming for Data Science, Samatrix.io - 2024

Statistics Using python, Samatrix.io - 2024
